Below you will find the objectives taken from the:

- Key Stage 3 National Curriculum
- Functional skills Level 1 Subject Content
- Functional skills Level 2 Subject Content
 - Key Stage 4 National Curriculum

with the covered topics where the objectives are seen.

Key Stage 3 National Curriculum

Through the mathematics content, pupils should be taught to:

Develop Fluency

Statements taken from the National Curriculum in England 2014

consolidate their numerical and mathematical capability from key stage 2 and extend their understanding of the number system and place value to include decimals, fractions, powers, and roots

select and use appropriate calculation strategies to solve increasingly complex problems use algebra to generalise the structure of arithmetic, including to formulate mathematical relationships

substitute values in expressions, rearrange and simplify expressions, and solve equations move freely between different numerical, algebraic, graphical, and diagrammatic representations [for example, equivalent fractions, fractions and decimals, and equations and graphs]

develop algebraic and graphical fluency, including understanding linear and simple quadratic functions

use language and properties precisely to analyse numbers, algebraic expressions, 2-D and 3-D shapes, probability, and statistics

Reason Mathematically

Statements taken from the National Curriculum in England 2014

extend their understanding of the number system; make connections between number relationships, and their algebraic and graphical representations

extend and formalise their knowledge of ratio and proportion in working with measures and geometry, and in formulating proportional relations algebraically

identify variables and express relations between variables algebraically and graphically

make and test conjectures about patterns and relationships; look for proofs or counter-examples

begin to reason deductively in geometry, number, and algebra, including using geometrical constructions

interpret when the structure of a numerical problem requires additive, multiplicative, or proportional reasoning

explore what can and cannot be inferred in statistical and probabilistic settings, and begin to express their arguments formally

Solve Problems

Statements taken from the National Curriculum in England 2014

develop their mathematical knowledge, in part through solving problems and evaluating the outcomes, including multi-step problems

develop their use of formal mathematical knowledge to interpret and solve problems, including in financial mathematics

begin to model situations mathematically and express the results using a range of formal mathematical representations

select appropriate concepts, methods, and techniques to apply to unfamiliar and non-routine problem

Number

Subject Content taken from the National	Lessons
Curriculum in England 2014	<u>Seen</u>
understand and use place value for decimals, measures, and integers of any size	N 3.1 N 3.2 N 3.6
order positive and negative integers, decimals, and fractions; use the number line as a model for ordering of the real numbers; use the symbols =, \neq , , \leq , \geq	N 2.1 N 3.1 N 4.3 N 5.2 A 7.1
use the concepts and vocabulary of prime numbers, factors (or divisors), multiples, common factors, common multiples, highest common factor, lowest common multiple, prime factorisation, including using product notation and the unique factorisation property	N 1.6 N 1.7 N 1.8
use the four operations, including formal written methods, applied to integers, decimals, proper and improper fractions, and mixed numbers, all both positive and negative	N 1.1 N 1.2 N 1.3 N 1.4 N 2.1 N 2.2 N 3.3 N 3.4 N 3.5 N 3.6 N 4.1 N 4.2 N 4.4 N 4.5 N 4.6 N 11.1
use conventional notation for the priority of operations, including brackets, powers, roots, and reciprocals	N 1.5
recognise and use relationships between operations including inverse operations	N 1.2 N 1.3 N 1.4 N 3.6
use integer powers and associated real roots (square, cube and higher), recognise powers of 2, 3, 4, 5 and distinguish between exact representations of roots and their decimal approximations	N 8.1 N 8.2 A 3.7
interpret and compare numbers in standard form $A \times 10^n \ 1 \le A < 10$, where n is a positive or negative integer or zero	N 9.1

work interchangeably with terminating decimals and their corresponding	N 5.1
fractions (such as 3.5 and $\frac{7}{2}$ or 0.375 and $\frac{3}{8}$)	
define percentage as 'number of parts per hundred', interpret percentages and percentage changes as a fraction or a decimal, interpret these multiplicatively, express one quantity as a percentage of another, compare two quantities using percentages, and work with percentages greater than 100%	N 5.1 N 6.1 N 6.2 N 6.3 N 6.4
interpret fractions and percentages as operators	N 4.7 N 6.2 N 6.3
use standard units of mass, length, time, money, and other measures, including	N 11.2
with decimal quantities	N 11.3
round numbers and measures to an appropriate degree of accuracy [for example,	N 7.1 N 7.2
to a number of decimal places or significant figures]	N 7.3
use approximation through rounding to estimate answers and calculate possible	N 7.5 N 7.6
resulting errors expressed using inequality notation a <x≤b< td=""><td></td></x≤b<>	
use a calculator and other technologies to calculate results accurately and then	N11.1
interpret them appropriately	
appreciate the infinite nature of the sets of integers, real and rational numbers	

<u>Algebra</u>

Subject Content taken from the National	Lessons
Curriculum in England 2014	<u>Seen</u>
use and interpret algebraic notation, including:	A 3.1
ab in place of a × b	
3y in place of $y + y + y$ and $3 \times y$	
a^2 in place of $a \times a$, a^3 in place of $a \times a \times a$; a^2b in place of $a \times a \times b$	
$\frac{a}{b}$ in place of a ÷ b	
coefficients written as fractions rather than as decimals	
brackets	
substitute numerical values into formulae and expressions, including scientific	A 3.9
formulae	
understand and use the concepts and vocabulary of expressions, equations,	A 3.1
inequalities, terms, and factors	
simplify and manipulate algebraic expressions to maintain equivalence by:	A 3.2 A 3.3
collecting like terms	A 3.4 A 3.5
multiplying a single term over a bracket	A 3.6 A 4.1
taking out common factors	
expanding products of two or more binomials	
understand and use standard mathematical formulae; rearrange formulae to	A 3.12
change the subject	

model situations or procedures by translating them into algebraic expressions or	A 3.1 R 4.2
formulae and by using graphs	
use algebraic methods to solve linear equations in one variable (including all	A 3.8 A 3.10
forms that require rearrangement)	A 3.11
work with coordinates in all four quadrants	A 1.1 A 1.2
recognise, sketch, and produce graphs of linear and quadratic functions of one	A 2.1 A 2.2
variable with appropriate scaling, using equations in x and y and the Cartesian	A 2.3 A 2.4
plane	A 4.5
interpret mathematical relationships both algebraically and graphically	A 3.1 R 4.2
reduce a given linear equation in two variables to the standard form $y = mx + c$;	A 2.4 A 2.5
calculate and interpret gradients and intercepts of graphs of such linear	
equations numerically, graphically, and algebraically	
use linear and quadratic graphs to estimate values of y for given values of x and	A 2.5 A 4.5
vice versa and to find approximate solutions of simultaneous linear equations	A 4.6 A 9.1
find approximate solutions to contextual problems from given graphs of a variety	A 2.5 A 4.6
of functions, including piece-wise linear, exponential and reciprocal graphs	A 6.1 A 6.2
	R 4.1 R 4.2
	R 4.3
generate terms of a sequence from either a term-to-term or a position-to-term	A 10.1
rule	
recognise arithmetic sequences and find the nth term	A 10.1
recognise geometric sequences and appreciate other sequences that arise	A 10.3

Ratio, Proportion & Rates of Change

Subject Content taken from the National	Lessons
Curriculum in England 2014	<u>Seen</u>
change freely between related standard units [for example time, length, area,	N 11.2
volume/capacity, mass]	N 11.3
	N 11.4
use scale factors, scale diagrams and maps	G 6.6
express one quantity as a fraction of another, where the fraction is less than 1	N 4.1 N 4.2
and greater than 1	
use ratio notation, including reduction to simplest form	R 1.1 R 1.2
divide a given quantity into two parts in a given part:part or part:whole ratio;	R 1.3 R 1.4
express the division of a quantity into two parts as a ratio	
understand that a multiplicative relationship between two quantities can be	R 1.1
expressed as a ratio or a fraction	
relate the language of ratios and the associated calculations to the arithmetic of	R 1.1
fractions and to linear functions	

solve problems involving percentage change, including: percentage increase,	N 6.4 N 6.5
decrease and original value problems and simple interest in financial	N 6.6
mathematics	
solve problems involving direct and inverse proportion, including graphical and	R 2.1 R 2.2
algebraic representations	
use compound units such as speed, unit pricing and density to solve problems	R 3.1 R 3.2

Geometry & Measures

Subject Content taken from the National	Lessons
Curriculum in England 2014	<u>Seen</u>
derive and apply formulae to calculate and solve problems involving: perimeter	G 2.1 G 2.2
and area of triangles, parallelograms, trapezia, volume of cuboids (including	G 2.3 G 2.4
cubes) and other prisms (including cylinders)	G 2.5 G 4.1
	G 4.3 G 5.3
calculate and solve problems involving: perimeters of 2-D shapes (including	G 2.1 G 2.2 G 2.3 G 2.4
circles), areas of circles and composite shapes	G 2.5 G 3.1
	G 3.3
draw and measure line segments and angles in geometric figures, including	G 5.1 G 5.2
interpreting scale drawings	G 6.1 G 6.6
derive and use the standard ruler and compass constructions (perpendicular	G 7.1 G 7.2
bisector of a line segment, constructing a perpendicular to a given line from/at a	
given point, bisecting a given angle); recognise and use the perpendicular	
distance from a point to a line as the shortest distance to the line	
describe, sketch and draw using conventional terms and notations: points, lines,	G 1.1 G 1.2
parallel lines, perpendicular lines, right angles, regular polygons, and other	
polygons that are reflectively and rotationally symmetric	
use the standard conventions for labelling the sides and angles of triangle ABC,	G 1.1 G 8.1
and know and use the criteria for congruence of triangles	
derive and illustrate properties of triangles, quadrilaterals, circles, and other	G 1.1 G 3.1
plane figures [for example, equal lengths and angles] using appropriate language	
and technologies	
identify properties of, and describe the results of, translations, rotations and	G 1.2 G 8.1
reflections applied to given figures	G 9.1 G 9.2
	G 9.3
identify and construct congruent triangles, and construct similar shapes by	G 7.3 G 8.1
enlargement, with and without coordinate grids	G 8.2 G 9.4
apply the properties of angles at a point, angles at a point on a straight line,	G 6.2
vertically opposite angles	
understand and use the relationship between parallel lines and alternate and	G 6.3
corresponding angles	

derive and use the sum of angles in a triangle and use it to deduce the angle sum	G 6.4 G 6.5
in any polygon, and to derive properties of regular polygons	
apply angle facts, triangle congruence, similarity, and properties of quadrilaterals	G 1.1 G 6.4
to derive results about angles and sides, including Pythagoras' Theorem, and use	G 6.5 G 8.1
known results to obtain simple proofs	G 8.2 G 10.1
use Pythagoras' Theorem and trigonometric ratios in similar triangles to solve	G 10.1
problems involving right-angled triangles	G 10.2
	G 10.3
use the properties of faces, surfaces, edges and vertices of cubes, cuboids,	G 1.3 G 1.4
prisms, cylinders, pyramids, cones, and spheres to solve problems in 3-D	
interpret mathematical relationships both algebraically and geometrically	G 2.1 G 2.2
	G 2.4 G 2.5

Probability

Pupils should be taught to:

Subject Content taken from the National	Lessons
Curriculum in England 2014	<u>Seen</u>
record, describe and analyse the frequency of outcomes of simple probability	P 1.1 P 1.2
experiments involving randomness, fairness, equally and unequally likely	
outcomes, using appropriate language and the 0-1 probability scale	
understand that the probabilities of all possible outcomes sum to 1	P 1.1
enumerate sets and unions/intersections of sets systematically, using tables,	P 2.5
grids, and Venn diagrams	
generate theoretical sample spaces for single and combined events with equally	P 2.1
likely, mutually exclusive outcomes and use these to calculate theoretical	
probabilities	

Statistics

Subject Content taken from the National	<u>Lessons</u>
Curriculum in England 2014	<u>Seen</u>
describe, interpret, and compare observed distributions of a single variable	S 1.3 S 2.1
through: appropriate graphical representation involving discrete, continuous and	S 2.2
grouped data; and appropriate measures of central tendency (mean, mode,	
median) and spread (range, consideration of outliers)	

construct and interpret appropriate tables, charts, and diagrams, including	S 1.4 S 1.5
frequency tables, bar charts, pie charts, and pictograms for categorical data, and	S 3.1 S 3.2
vertical line (or bar) charts for ungrouped and grouped numerical data	\$ 3.3 \$ 3.4 \$ 3.5
describe simple mathematical relationships between two variables (bivariate	S 3.6
data) in observational and experimental contexts and illustrate using scatter	
graphs	

Functional Skills Level 1 Subject Content

Level 1 - using numbers and the number system –	Lessons
whole numbers, fractions, decimals and percentages	<u>Seen</u>
1. Read, write, order and compare large numbers (up to one million)	
2. Recognise and use positive and negative numbers	N 1.1 N 1.2
	N 1.3 N 1.4
	N 2.1 N 11.1
3. Multiply and divide whole numbers and decimals by 10, 100, 1000	N 3.2
4. Use multiplication facts and make connections with division facts	N 3.6
5. Use simple formulae expressed in words for one or two-step operations	A 3.8
6. Calculate the squares of one-digit and two-digit numbers	N 8.1
7. Follow the order of precedence of operators	N 1.5
8. Read, write, order and compare common fractions and mixed numbers	N 4.1 N 4.2
	N 4.3
9. Find fractions of whole number quantities or measurements	N 4.7
10. Read, write, order and compare decimals up to three decimal places	N 3.1
11. Add, subtract, multiply and divide decimals up to two decimal places	N 3.3 N 3.4
	N 3.5
12. Approximate by rounding to a whole number or to one or two decimal places	N 7.1 N 7.2
13. Read, write, order and compare percentages in whole numbers	N 5.2
14. Calculate percentages of quantities, including simple percentage increases	N 6.2 N 6.3
and decreases by 5% and multiples thereof	N 6.4
15. Estimate answers to calculations using fractions and decimals	N 7.5
16. Recognise and calculate equivalences between common fractions,	N 5.1 N 5.2
percentages and decimals	
17. Work with simple ratio and direct proportions	R 1.1 R 1.2
	R 1.3 R 1.4
	R 2.1

Level 1 - using common measures, shape and space	<u>Lessons</u> Seen
18. Calculate simple interest in multiples of 5% on amounts of money	N 6.4
19. Calculate discounts in multiples of 5% on amounts of money	N 6.4
20. Convert between units of length, weight, capacity, money and time, in the same system	N 11.2 N 11.3 G 5.2
21. Recognise and make use of simple scales on maps and drawings	G 5.1 G 6.6
22. Calculate the area and perimeter of simple shapes including those that are made up of a combination of rectangles	G 2.1 G 2.2
23. Calculate the volumes of cubes and cuboids	G 4.3
24. Draw 2-D shapes and demonstrate an understanding of line symmetry and knowledge of the relative size of angles	G 1.1 G 1.2
25. Interpret plans, elevations and nets of simple 3-D shapes	G 1.3 G 1.4
26. Use angles when describing position and direction, and measure angles in degrees	G 6.1 G 6.6

Level 1 - handling information and data	Lessons Seen
27. Represent discrete data in tables, diagrams and charts including pie charts, bar charts and line graphs	\$ 1.4 \$ 1.5 \$ 3.1 \$ 3.2
28. Group discrete data and represent grouped data graphically	\$ 1.4 \$ 3.1 \$ 3.2
29. Find the mean and range of a set of quantities	S 2.1
30. Understand probability on a scale from 0 (impossible) to 1 (certain) and use probabilities to compare the likelihood of events	P 1.1
31. Use equally likely outcomes to find the probabilities of simple events and express them as fractions	P 1.1

Level 1 - solving mathematical problems and decision making

Students at Level 1 are expected to be able to:

- Read, understand and use mathematical information and mathematical terms used at this level;
- Address individual problems as described above;
- Use knowledge and understanding to a required level of accuracy;
- Analyse and interpret answers in the context of the original problem;
- Check the sense, and reasonableness, of answers; and
- Present results with appropriate explanation and interpretation demonstrating simple reasoning to support the process and show consistency with the evidence presented.

The context of individual problems at this level will require some comprehension in order for the student to be able independently to identify and carry out an appropriate mathematical approach.

Functional Skills Level 2 Subject Content

Level 2 - using numbers and the number system -	Lessons
whole numbers, fractions, decimals and percentages	<u>Seen</u>
1. Read, write, order and compare positive and negative numbers of any size	N 2.1 N 3.1
2. Carry out calculations with numbers up to one million including strategies to	N 1.1 N 1.2
check answers including estimation and approximation	N 1.3 N 1.4
	N 3.6 N 7.2 N 7.5 N 11.1
3. Evaluate expressions and make substitutions in given formulae in words and	A 3.1 A 3.8
symbols	A 3.9
4. Identify and know the equivalence between fractions, decimals and	N 5.1 N 5.2
percentages	
5. Work out percentages of amounts and express one amount as a percentage of	N 6.1 N 6.2
another	N 6.3
6. Calculate percentage change (any size increase and decrease), and original	N 6.4 N 6.5
value after percentage change	N 6.6
7. Order, add, subtract and compare amounts or quantities using proper and	N 4.1 N 4.2
improper fractions and mixed numbers	N 4.3 N 4.4
8. Express one number as a fraction of another	N 4.1
9. Order, approximate and compare decimals	N 3.1
10. Add, subtract, multiply and divide decimals up to three decimal places	N 3.3 N 3.4
	N 3.5
11. Understand and calculate using ratios, direct proportion and inverse	R 1.1 R 1.2
proportion	R 1.3 R 1.4 R 2.1 R 2.2
12. Follow the order of precedence of operators, including indices	N 1.5

Level 2 - measures, shape and space	<u>Lessons</u> <u>Seen</u>
13. Calculate amounts of money, compound interest, percentage increases, decreases and discounts including tax and simple budgeting	N 6.7 N 11.3
14. Convert between metric and imperial units of length, weight and capacity using a) a conversion factor and b) a conversion graph	R 4.1 G 5.2
15. Calculate using compound measures including speed, density and rates of pay	R 3.1 R 3.2
16. Calculate perimeters and areas of 2-D shapes including triangles and circles	G 2.1 G 2.2
and composite shapes including non-rectangular shapes (formulae given except	G 2.4 G 3.1
for triangles and circles)	G 3.3
17. Use formulae to find volumes and surface areas of 3-D shapes including cylinders (formulae to be given for 3-D shapes other than cylinders)	G 4.1 G 4.3
18. Calculate actual dimensions from scale drawings and create a scale diagram given actual measurements	G 1.4
19. Use coordinates in 2-D, positive and negative, to specify the positions of points	A 1.1
20. Understand and use common 2-D representations of 3-D objects	G 1.4
21. Draw 3-D shapes to include plans and elevations	G 1.3 G 1.4
22. Calculate values of angles and/or coordinates with 2-D and 3-D shapes	A 1.1 G 1.1
	G 1.3 G 6.1
	G 6.4 G 6.5

Level 2 - handling information and data	<u>Lessons</u> <u>Seen</u>
23. Calculate the median and mode of a set of quantities	S 2.1
24. Estimate the mean of a grouped frequency distribution from discrete data	S 2.2
25. Use the mean, median, mode and range to compare two sets of data	S 1.5 S 2.1
26. Work out the probability of combined events including the use of diagrams	P 2.1
and tables, including two-way tables	
27. Express probabilities as fractions, decimals and percentages	P 1.1
28. Draw and interpret scatter diagrams and recognise positive and negative correlation	\$ 3.6

Level 2 - solving mathematical problems and decision making

Students at Level 2 are expected to be able to:

- Read, understand, and use mathematical information and mathematical terms;
- Address individual problems as described above;
- Use knowledge and understanding to a required level of accuracy;
- Identify suitable operations and calculations to generate results;
- Analyse and interpret answers in the context of the original problem;
- Check the sense and reasonableness of answers; and
- Present and explain results clearly and accurately demonstrating reasoning to support the process and show consistency with the evidence presented.

The context of individual problems at this level will require interpretation and analysis in order for the student to be able independently to identify and carry out an appropriate mathematical process or processes.

Key Stage 4 National Curriculum

(Higher content in **bold**)

Through the mathematics content, pupils should be taught to:

Develop Fluency

Statements taken from the National Curriculum in England 2014

consolidate their numerical and mathematical capability from key stage 3 and extend their understanding of the number system to include powers, roots **{and fractional indices}**

select and use appropriate calculation strategies to solve increasingly complex problems, including exact calculations involving multiples of π {and surds}, use of standard form and application and interpretation of limits of accuracy

consolidate their algebraic capability from key stage 3 and extend their understanding of algebraic simplification and manipulation to include quadratic expressions, {and expressions involving surds and algebraic fractions}

extend fluency with expressions and equations from key stage 3, to include quadratic equations, simultaneous equations, and inequalities

move freely between different numerical, algebraic, graphical, and diagrammatic representations, including of linear, quadratic, reciprocal, **{exponential and trigonometric}** functions

use mathematical language and properties precisely

Reason Mathematically

Statements taken from the National Curriculum in England 2014

extend and formalise their knowledge of ratio and proportion, including trigonometric ratios, in working with measures and geometry, and in working with proportional relations algebraically and graphically

extend their ability to identify variables and express relations between variables algebraically and graphically

make and test conjectures about the generalisations that underlie patterns and relationships; look for proofs or counter-examples; begin to use algebra to support and construct arguments {and proofs}

reason deductively in geometry, number, and algebra, including using geometrical constructions

interpret when the structure of a numerical problem requires additive, multiplicative, or proportional reasoning

explore what can and cannot be inferred in statistical and probabilistic settings, and express their arguments formally

assess the validity of an argument and the accuracy of a given way of presenting information

Solve Problems

Statements taken from the National Curriculum in England 2014

develop their mathematical knowledge, in part through solving problems and evaluating the outcomes, including multi-step problems

develop their use of formal mathematical knowledge to interpret and solve problems, including in financial contexts

make and use connections between different parts of mathematics to solve problems

model situations mathematically and express the results using a range of formal mathematical representations, reflecting on how their solutions may have been affected by any modelling assumptions

elect appropriate concepts, methods, and techniques to apply to unfamiliar and non-routine problems; interpret their solution in the context of the given problem

Number

quadratic formula}; find approximate solutions using a graph	A 4.10 A 4.11
7 11 5 5 1	A 4.12
solve two simultaneous equations in two variables (linear/linear {or	A 9.1 A 9.2
linear/quadratic}) algebraically; find approximate solutions using a graph	
{find approximate solutions to equations numerically using iteration}	A 8.1 A 8.2
translate simple situations or procedures into algebraic expressions or formulae;	A 3.1 A 3.10
derive an equation (or two simultaneous equations), solve the equation(s) and	A 3.11 A 9.1
interpret the solution	G 2.1 G 2.2
The prevene solution	G 2.3 G 2.4
	G 2.5 G 6.4
	G 6.5
solve linear inequalities in one {or two} variable{s}, {and quadratic inequalities	A 7.1 A 7.2
in one variable}; represent the solution set on a number line, {using set notation	A 7.3 A 7.4
and on a graph}	
recognise and use sequences of triangular, square and cube numbers, simple	A 10.1 A 10.2
arithmetic progressions, Fibonacci type sequences, quadratic sequences, and	A 10.3
simple geometric progressions (r n where n is an integer, and r is a positive	
rational number {or a surd}) {and other sequences}	
deduce expressions to calculate the nth term of linear {and quadratic} sequences	A 10.1 A 10.2

Ratio, Proportion & Rates of Change

Subject Content taken from the National	<u>Lessons</u>
Curriculum in England 2014	<u>Seen</u>
compare lengths, areas and volumes using ratio notation and/or scale factors;	G 5.2 G 5.3
make links to similarity (including trigonometric ratios)	G 8.2
convert between related compound units (speed, rates of pay, prices, density,	R 3.1 R 3.2
pressure) in numerical and algebraic contexts	R 3.3
understand that X is inversely proportional to Y is equivalent to X is proportional	R 2.2 R 2.3
to $\frac{1}{y}$; {construct and} interpret equations that describe direct and inverse	R 2.4
proportion	
interpret the gradient of a straight-line graph as a rate of change; recognise and	R 4.1 R 4.2
interpret graphs that illustrate direct and inverse proportion	R 4.3
{interpret the gradient at a point on a curve as the instantaneous rate of	R 4.5
change; apply the concepts of instantaneous and average rate of change	
(gradients of tangents and chords) in numerical, algebraic, and graphical	
contexts}	
set up, solve, and interpret the answers in growth and decay problems, including	N 6.7 A 8.2
compound interest {and work with general iterative processes}	

Geometry & Measures

Subject Content taken from the National	Lessons
Curriculum in England 2014	<u>Seen</u>
interpret and use fractional {and negative} scale factors for enlargements	G 9.4 G 9.5
{describe the changes and invariance achieved by combinations of rotations,	G 8.1 G 9.1
reflections, and translations}	G 9.2 G 9.3
	G 9.4
identify and apply circle definitions and properties, including: centre, radius,	G 3.1 G 3.3
chord, diameter, circumference, tangent, arc, sector, and segment	
{apply and prove the standard circle theorems concerning angles, radii,	G 12.1
tangents, and chords, and use them to prove related results}	G 12.2
construct and interpret plans and elevations of 3D shapes	G 1.4
interpret and use bearings	G 6.6
calculate arc lengths, angles, and areas of sectors of circles	G 3.2 G 3.4
calculate surface areas and volumes of spheres, pyramids, cones, and composite	G 4.1 G 4.2
solids	G 4.3 G 4.4
apply the concepts of congruence and similarity, including the relationships	G 5.3 G 8.1
between lengths, {areas and volumes} in similar figures	G 8.2
apply Pythagoras' Theorem and trigonometric ratios to find angles and lengths in	A1.3 G 10.1
right-angled triangles {and, where possible, general triangles} in two {and three}	G 10.2
dimensional figures	G 10.3
	G 10.4
	G 10.5
know the exact values of $\sin \theta$ and $\cos \theta$ for $\theta = 0^{\circ}$, 30° , 45° , 60° and 90° ; know	G 10.6 G 10.4
the exact value of $\tan \theta$ for $\theta = 0^\circ$, 30°, 45° and 60°	0 10.4
{know and apply the sine rule, $\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C}$, and cosine rule, $a^2 = b^2 + \frac{b}{\sin C}$	G 10.5
$\sin A = \sin B = \sin C$ $c^2 - 2bc \cos A$, to find unknown lengths and angles}	G 10.6
{know and apply $Area = \frac{1}{2}ab \sin C$ to calculate the area, sides, or angles of	G 10.7
any triangle}	
describe translations as 2D vectors	G 9.3 G 11.1
apply addition and subtraction of vectors, multiplication of vectors by a scalar,	G 11.1
and diagrammatic and column representations of vectors; {use vectors to	
construct geometric arguments and proofs}	

Probability

In addition to consolidating subject content from key stage 3, pupils should be taught to:

Subject Content taken from the National	Lessons
Curriculum in England 2014	<u>Seen</u>
apply the property that the probabilities of an exhaustive set of mutually	P 1.1
exclusive events sum to one	
use a probability model to predict the outcomes of future experiments;	P 1.2
understand that empirical unbiased samples tend towards theoretical probability	
distributions, with increasing sample size	
calculate the probability of independent and dependent combined events,	P 2.1
including using tree diagrams and other representations, and know the	P 2.3 P 2.4
underlying assumptions	P 2.5
{calculate and interpret conditional probabilities through representation using	P 2.1
expected frequencies with two-way tables, tree diagrams and Venn diagrams}	P 2.3 P 2.4
	P 2.5

Statistics

Subject Content taken from the National	Lessons
Curriculum in England 2014	<u>Seen</u>
infer properties of populations or distributions from a sample, whilst knowing the	S 1.1 S 1.2
limitations of sampling	S 1.3
interpret and construct tables and line graphs for time series data	S 3.5
{construct and interpret diagrams for grouped discrete data and continuous	S 3.4 S 3.7
data, i.e. histograms with equal and unequal class intervals and cumulative	S 3.9
frequency graphs, and know their appropriate use}	
interpret, analyse, and compare the distributions of data sets from univariate	S 1.4 S 1.5
empirical distributions through:	S 2.1 S 2.2
appropriate graphical representation involving discrete, continuous, and grouped	S 3.1 S 3.2
data, {including box plots}	S 3.3 S 3.8
appropriate measures of central tendency (including modal class) and spread	
{including quartiles and inter-quartile range}	
apply statistics to describe a population	S 1.2
use and interpret scatter graphs of bivariate data; recognise correlation and	S 3.6
know that it does not indicate causation; draw estimated lines of best fit; make	
predictions; interpolate and extrapolate apparent trends whilst knowing the	
dangers of so doing
